## Summary

I'm living the dream.

I've always been a great problem solver, an independent introvert, and a technophile obsessed with the latest devices. Currently, I'm doing my BE in CS from DIEMS Aurangabad, and I get to explore and show off all these elements of who I am.

I started learning to code in my early days of school, though it was always more of a hobby than a hard-core career focus. After 12th, I realized software engineering was the right field for me and I took admitted to BE.

Since then, I've worked on countless Self projects and have been a part of a startup[mblazr, Pune ] as a Software Developer.

My main goal, for now, is to work on more React projects and integrate Django Rest Framework.

And also to maintain industry standards and practices.

Other than web development, I am also interested in competitive programming and I use mainly C++ when doing competitive programming.

I'm familiar with a variety of programming languages, including Cpp, Python, Django, JavaScript, HTML, CSS, jQuery, and React but I'm always adding new skills to my repertoire.

I'm also eager to meet other software engineers in the area, so feel free to connect!

## Experience

**Smart Foundation Systems | Aurangabad, Maharashtra**
**Full Stack Web Developer | 10/2022 - 12/2022**
